

FREDRIK LINDROS

SENIOR FULLSTACK DEVELOPER and
SYSTEM ARCHITECT

PROFILE

Since 1998 I have been working as system architect and full stack developer primarily for the transport sector in Sweden. One of my key strengths is the ability to break down complex, real-world challenges and design solutions that streamline workflows.

By working closely with end users, I've gained a deep understanding of diverse business processes, reinforcing the need to tailor IT systems to meet specific operational demands.

Over the years, the technology stack has evolved significantly. More recently, my focus has shifted toward cloud solutions and SaaS implementations, ensuring systems are scalable, flexible, and future-ready.

Outside of work, I live in Vellinge, Sweden, with my family. I enjoy cycling with friends and spending time with my daughter in the stable with our horse.

EDUCATION

Lund university – Department of informatics
